

# i@Connect

## Middleware for Payment & Messaging System

i@Connect® gives a competitive Straight Through Processing (STP) capability to process payment requests between Core Banking System or Trade Finance System and Payment systems like RTGS, NEFT, SWIFT, etc. i@Connect® can help process a very large volume of transactions in no time, completely automated with no manual intervention. i@Connect® integrates nicely with Core Banking System and with existing Payment Initiation applications.

CPS - H2H enabled for more than 250+ Sub-members banks. CPS is enabled for corporate through netbanking and H2H is enabled for Bank-to-Bank STP web-service.

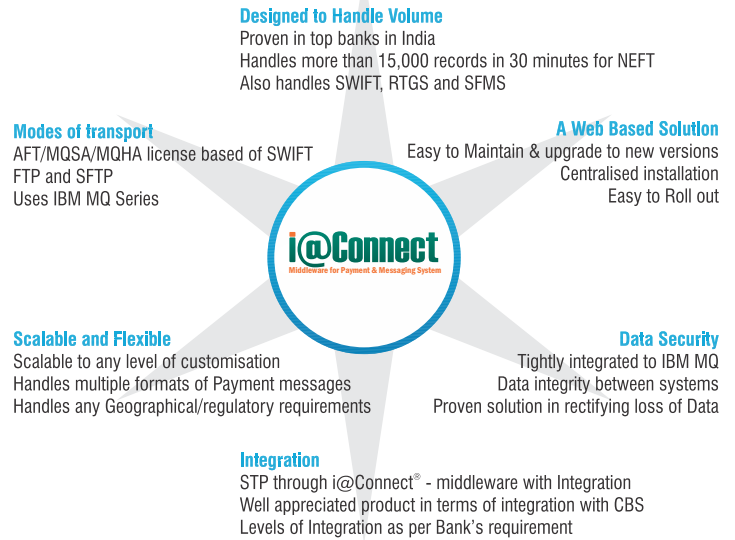

### What you get?

**Increased revenue | Reduced expenses | Increased operating margin**

**Speed | Quality | Reliability | Accuracy | Increased Customer Satisfaction Index**

### Business Benefits

- Complete solutions for end to end processing for NEFT, RTGS and SWIFT Transactions, which includes INWARD-OUTWARD payment transactions, Acknowledgment handling and reconciliation Reports
- Seamless Integration with Core Banking system, RBI Gateway and other external systems – to achieve STP
- Dashboard for throughout monitoring the transactions with various statuses
- Data consistency and integrity are maintained between CBS and i@Connect®. Eliminates errors and reduces manual audit
- User-Friendly UI for Branch, HO and Admin Operations
- Multithreaded processing capabilities to process high volume of transactions with high efficiency
- Developed using Enterprise Java. Portable across many platforms. Vendor neutral, and thus offers wide deployment options to business

### i@Connect® for Sub member Banks

i@Connect® will help bank to reach out to rural sectors through their sub member banks by extending their NEFT and RTGS services to their customers, with the help of a Straight Through Processing payment and messaging system middleware.

- RBI membership of NEFT & RTGS not required**
- Substantial Cost Saving for Sub-Member Bank**
- Sub-Member bank - a branch of Sponsored Bank – Improves TAT**
- Ensures Data integrity with Straight through Processing (STP)**
