Management

i-AMS

Audit Management System

Audit Management System is designed to help organizations to manage a wide range of audit-related activities and processes in a single and comprehensive framework. This audit management software provides the flexibility to support all types of audits, including Internal Audits, Concurrent Audit, Information Security Audit, Credit Audit (Account based), Snap Audit and Management Audit.

It also provides end-to-end functionalities for managing the complete audit lifecycle - from audit planning and scheduling, to the development of standard audit plans and checklists, to field data collection, to the development of audit reports and recommendations, to the review of audit recommendations by auditees and the Management, to the implementation of audit recommendations.

AMS has been designed keeping in mind the requirement of major organizations in India and abroad. The solution is GRC compliant (Governance, Risk, Compliance) to meet corporate strategy, risk management and control initiatives in organizations.
