National Automated Clearing House

Centralized Transaction Processing System

i-NACH

National Automated Clearing House

NPCI (National Payment Corporation of India) has launched NACH (National Automated Clearing House). NACH is a centralized system, launched with an aim to consolidate multiple ECS systems running across the country, which provides a framework for the harmonization of standards and practices and removes local barriers / inhibitors

For the successful on-boarding for ACH DR, it is imperative to have an application for transaction processing as well as Mandate Management System (MMS) in place. Intech has developed an application called "i-NACH" for transaction processing.

Key Features

Centralized Auto processing of all inward NACH payments

Centralized Auto generation of NACH return files with NACH specified return reason codes.

Seamless integration of digital signature attachments.

Straight through processing of NACH inward files transactions and Auto generation of NACH specified formats for NACH returns (Outward).

GUI screens to monitor the transaction and handle the suspense DR / CR transactions due to posting failures in CBS

Scalability to handle large volume of transactions

Business Benefits

Single sign on through customized finacle menu option

Minimization of time duration to process of Mandates and improved TAT.

Inbuilt mechanism for encryption of mandate files for outward transactions.

Scalability to handle large volume of image files in straight through process in case of auto returns.

Can be launched across the branches. Quick rollout and Faster go-to-market with payment capability

Data consistency and integrity between CBS and iNACH. Eliminates errors and reduces manual audit and rework
