Real Time Monitoring System

The Real Time Monitoring System developed by IDBI Intech is a system that gives users, unique features, starting from real time transaction scanning, name scanning against sanction lists to identify suspicious transactions / money laundering attempts in their organizations, report suspicious transactions to Regulatory Authority and take preventive action / block the transactions as per the Regulatory Guidelines / Anti Money Laundering Act of India.

The system has a robust design to put a surveillance mechanism in place- not only for SWIFT, but also for the payment systems viz. Mobile Money, Exchange House transaction etc. The unique generic framework has the flexibility to accommodate specific requirements of the clients.

## Key Features

Sanction Screening of Payment Messages

SWIFT outward messages scanning against watchlist

SWIFT message screening on online basis

Case Management

Comments and audit trail available for compliance

## Business Benefits

Identification of fraudulent / suspicious transaction

Regulatory Compliances

Real-time analysis of payment messages

Online verification of payment messages from AML perspective

Reconciliation can be done in the gateway
